

# ANNUAL REPORT ON TRANSSHIPMENT

June, 2026

JAPAN

Transshipment operations by Japanese large-scale tuna longline vessels (LSTLVs) are being carried out based on Resolution C-22-03. The masters/owners of the LSTLVs shall notify transshipment information (including the name of receiving vessel, date, location and amount of fish to be transshipped) to the Fisheries Agency for prior authorization, and transmit the IATTC Transshipment Declaration after the transshipment.

In 2024, 3 Japanese LSTLVs carried out transshipment operations, and 446.6 tons of tunas, tuna-like species and others were transshipped to carrier vessels authorized to receive transshipments at sea in the IATTC area. The quantities by species transshipped during 2024 are shown in Table 1. The list of the IATTC LSTLVs which have transshipped during 2024 are shown in Table 2.

Table 1. The quantities by species transshipped during 2024.

Species	Transshipped product weight (t)
BET	204.9
YF	131.9
SWO	37.3
OT	72.6
Total	446.6

Table 2. List of the LSTLVs in the IATTC record of fishing vessels which have transshipped during 2024

No.	Name of LSTLVs	IMO Number	IATTC Register Number
1	Toyokuni Maru No. 31	9119050	4241
2	Ryofuku Maru No. 38	9674672	15314
3	Ryofuku Maru No. 35	9866146	17387

Table 3. List of the fishing vessels not included in the IATTC Regional Vessel Register which have transshipped during 2024.
