

REPORT ON IN-PORT TRANSSHIPMENT BY JAPANESE VESSELS IN 2024

JUNE, 2025

JAPAN

1. In-port transshipment in the EPO by Japanese-flagged longline fishing vessels

No Japanese LSTLVs carried out in-port transshipment operations in the EPO in 2024.

2. In-port transshipment in the EPO by Japanese-flagged receiving vessels

No Japanese-flagged receiving vessel conducted in-port transshipment in the EPO in 2024.

REPORT ON IN-PORT TRANSSHIPMENT BY JAPANESE VESSELS IN 2022

JUNE, 2023

JAPAN

1. In-port transshipment in the EPO by Japanese-flagged longline fishing vessels

In 2022, 2 Japanese LSTLVs carried out transshipment operations in port in IATTC area, and 243.27 tons of tunas, tuna-like species and others were transshipped to carrier vessels authorized to receive transshipments. The quantities by species transshipped during 2022 are shown in Table 1. The list of the IATTC LSTLVs which have transshipped during 2022 are shown Table 2. All the transshipment operations were monitored by observers placed on board in accordance with the IATTC Regional Observer Program.

Table 1. The quantities by species transshipped during 2022.

	Transhipped product weight(t)
BET	137.65
SWO	49.81
ALB	49.28
Striped Marlin	2.21
YFT	1.04
OT	3.28
Total	243.27

Name of LSTLVs	IATTC Register Number
KAIO MARU No.81	15577
KAIO MARU NO108	4817

2. In-port transshipment in the EPO by Japanese-flagged receiving vessels

No Japanese-flagged receiving vessel conducted in-port transshipment in the EPO in 2022.

ANNUAL REPORT ON TRANSSHIPMENT

September, 2022

JAPAN

Transshipment operations by Japanese large-scale tuna longline vessels (LSTLVs) are being carried out based on Resolution C-12-07. The masters/owners of the LSTLVs shall notify transshipment information (including the name of receiving vessel, date, location and amount of fish to be transshipped) to the Fisheries Agency for prior authorization, and transmit the IATTC Transshipment Declaration after the transshipment.

In 2021, 17 Japanese LSTLVs carried out transshipment operations, and 1,408.4 tons of tunas, tuna-like species and others were transshipped to carrier vessels authorized to receive transshipments in the IATTC area. The quantities by species transshipped during 2021 are shown in Table 1. The list of the IATTC LSTLVs which have transshipped during 2021 are shown Table 2.

Table 1. The quantities by species transshipped during 2021.

Species	Transshipped product weight (t)
BET	798.2
YF	278.8
SWO	125.4
OT	206
Total	1408.4

REPORT ON IN-PORT TRANSSHIPMENT BY JAPANESE VESSELS IN 2021

JUNE, 2022

JAPAN

1. In-port transshipment in the EPO by Japanese-flagged longline fishing vessels

No Japanese-flagged longline fishing vessel conducted in port transshipment in the EPO in 2021.

2. In-port transshipment in the EPO by Japanese-flagged receiving vessels

No Japanese-flagged receiving vessel conducted in-port transshipment in the EPO in 2021.

REPORT ON IN-PORT TRANSSHIPMENT BY JAPANESE VESSELS IN 2020

JUNE, 2021

JAPAN

1. In-port transshipment in the EPO by Japanese-flagged longline fishing vessels

No Japanese-flagged longline fishing vessel conducted in port transshipment in the EPO in 2020.

2. In-port transshipment in the EPO by Japanese-flagged receiving vessels

No Japanese-flagged receiving vessel conducted in-port transshipment in the EPO in 2020.

REPORT ON IN-PORT TRANSSHIPMENT BY JAPANESE VESSELS IN 2019

JULY, 2020

JAPAN

1. In-port transshipment in the EPO by Japanese-flagged longline fishing vessels

In 2019, a total of thirteen (13) Japanese-flagged longline vessels listed below conducted in-port transshipment in the EPO.

No.	Name of LSTLVs	IATTC Register Number
1	TOEI MARU No. 8	4163
2	SUMIYOSHI MARU No. 71	4153
3	KAIO MARU No. 108	4817
4	CHOKYU MARU No. 68	9137
5	KAIO MARU No. 81	15577
6	KOKEI MARU No.18	5519
7	ISOMAE MARU No. 21	4457
8	KINEI MARU No. 138	9055
9	CHOKYU MARU No. 12	9127
10	GOEI MARU No.8	4915
11	CHOKYU MARU No. 8	4919
12	CHOKYU MARU No.35	9129
13	GOEI MARU No. 38	4887

In the above in-port transshipment, a total of 2,484 metric tons of tuna and tuna-like species was transshipped in the in-port transshipment. The below shows the product weight by species.

Species	Transshipped product weight (t)
BFT	198.4
BET	978.1
YF	537.1
SWO	354.6
WM	3.3
BUM	0.4
OT	412.1
Total	2,484

2. In-port transshipment in the EPO by Japanese-flagged receiving vessels

No Japanese-flagged receiving vessels conducted in-port transshipment in the EPO in 2019.
