3. Priority elements of the Committee's draft Work Plan: progress made

Resolution C-22-02 establishes for the Committee to convene a special meeting every two years to consider improvements to the compliance review process. In accordance with the *Priority Elements of a draft Work Plan for the COR*, the Committee will review the progress made on its implementation.

a) Automation of the compliance process: plan of action and online system

Pursuant to Element 1 of the Priority Elements, the IATTC Secretariat was tasked with preparing a draft plan of action on automation, with options for updating the compliance review process, including an online system for the submission of reports. The Secretariat will present its document and the advances of this process, and the Committee will consider it and provide recommendations as it deems appropriate.

b) Other priority elements: progress and status

The Committee will receive an update on the remaining priority elements of the Work Plan, taking into account the timelines established therein, and will consider what further action, if any, it wishes to recommend to guide this process.

4. Categorization of Non-Compliance Status and Follow-up Actions

At its 16th meeting, the Committee recommended that intersessional work be conducted to further develop the Categorization of Non-Compliance Status and Follow-up Actions, using document COR-16-INF-A as a basis, with the Chair leading the process with the support of the Secretariat and seeking input from all interested CPCs, in order to produce a document for discussion at the present meeting.

In fulfilment of that mandate, the Chair will present the working document resulting from the intersessional process. The Committee will consider the document and determine further steps.

The Committee will also have before it, for information and support for its deliberations, a factual note prepared by the Secretariat addressing the scope of the Committee's mandate under Annex 3 of the Antigua Convention and Resolution C-22-02, and the basis for the follow-up actions and its potential integration in the categorization system under development.

5. Recommendations for the Commission on the proposed improvements to the compliance process

The Committee will consider what recommendations it wishes to make to the Commission on improvements to the compliance process.

6. Other business

This agenda item is intended to provide a limited opportunity for the Committee to consider any other relevant issue related to the improvement of the compliance process.
