

JOINT WORKING GROUP ON FISHING BY NON-PARTIES

3RD MEETING

LIMA (PERU)
10 JUNE 2004

DOCUMENT JWG-3-04

**IDENTIFICATION OF VESSELS OF NON-PARTIES FISHING IN THE
EASTERN PACIFIC**

At the second meeting of the Joint Working Group on Fishing by Non-Parties, held in Antigua, Guatemala, in June 2003, its terms of reference were agreed. Among the functions established by the terms of reference is that stated in 2.a: “identify non-parties with vessels fishing in the region, and identify the individual vessels of non-parties.”

With respect to the AIDCP, the non-parties with vessels fishing in the region are Belize, Canada, Chile, China, Georgia, Indonesia, Korea, Chinese Taipei, and St. Vincent, and of these, only Belize has purse-seine vessels. Thus, since the AIDCP deals exclusively with purse-seine fishing, only Belize can be considered in this context. In 2003 only one of the Belize purse seiners was of more than 363 metric tons capacity and thus fell under the purview of the Agreement. In late 2003 this vessel changed flag, so as far as the AIDCP is concerned, there are no longer any non-parties with vessels fishing in the eastern Pacific.

With respect to the IATTC, the non-parties with vessels fishing in the region are Belize, Bolivia, Canada, Chile, China, Colombia, Georgia, Honduras, Indonesia, Korea, Chinese Taipei, and St. Vincent.

The Commission staff has compiled two lists of vessels of non-parties, as required by the terms of reference, that include all vessels that fished during 2003 and/or during 2004 as of June 1. As mentioned above, the AIDCP list currently contains no vessels. The IATTC list (Appendix A) is composed of vessels of non-parties to the Commission, classified by gear type (purse-seine (PS), pole-and-line (LP), and longline (LL)); it does not include troll vessels fishing for albacore tuna. Canada has only troll vessels fishing in the EPO. Vessels from Chile primarily target swordfish, using longlines, gillnets, and harpoons; the Commission staff does not have information on individual vessels from Chile.

Of the Honduras longline vessels listed, only four, the *Camilla*, *Pos Li*, *Pos LI 2*, and *Ugora*, are still fishing; the others have all been removed from the Honduras register.

The terms of reference specify “vessels fishing in the region,” but there is one case of a Netherlands Antilles pole-and-line vessel, the *Faro Villano*, that is operating in the region but, as far as can be ascertained, has never landed any fish. This vessel may be acting as a tender vessel, in contravention of the IATTC [*Resolution on fish-aggregating devices*](#); if this is the case, the vessel, although not actually fishing, could be considered to come under the aegis of the Working Group.

APPENDIX A. Vessels of non-parties to the IATTC that fished in the eastern Pacific Ocean during 2003 and/or 2004 (to June 1). PS: purse-seine; LP: pole-and-line; LL: longline.

ANEXO A. Buques de no partes de la CIAT que pescaron en el Océano Pacífico oriental durante 2003 y/o 2004 (hasta el 1 de junio). PS: red de cerco; LP: caña; LL: palangre.
