### **INTER-AMERICAN TROPICAL TUNA COMMISSION**

#### SCIENTIFIC ADVISORY COMMITTEE

## **TENTH MEETING**

San Diego, California (USA) 13-17 May 2019

# **DOCUMENT SAC-10-02 (REVISED)**

# IMPLEMENTATION OF RECOMMENDATIONS ADOPTED AT THE PREVIOUS SAC MEETING: PROGRESS AND OUTCOMES

At its annual meetings, the Scientific Advisory Committee (SAC) makes recommendations to the Commission, many of which involve actions by the staff. This document lists the recommendations currently requiring action by the staff and/or the Commission, and their current status: green: completed; yellow: in progress, incomplete; orange: planned, but pending funding; red: no action. For the full recommendations made at SAC-09, see <a href="here">here</a>.

	Recommendation, SAC-09	Status (25 April 2019)					
	TUNAS						
1.	Pacific bluefin tuna. The SAC recommends that the Commission take note of the current status of Pacific bluefin tuna, the different impacts of harvesting small and large bluefin, and of the increased risks of not achieving the rebuilding targets, if the current resolution (C-16-08) is modified to increase current catch limits.	The Commission was informed of the risks of modifying the resolution, and a new resolution was adopted (C-18-01) that maintains the same restrictions					
2.	South Pacific albacore. Assessments of South Pacific albacore have not considered the fisheries data in all of the EPO, and so the eastern part of the stock is effectively not assessed. The SAC recommends that the IATTC staff work with SPC to ensure that the entire South Pacific is included in future assessments.	The Staff Activities and Research Workplan includes a benchmark assessment of South Pacific albacore in 2022 ( <b>Project H.7.c</b> ). The project includes a workshop to develop the assessment, but funding is pending.					
	RESEARCH						
3.	Strategic Science Plan (SSP). Send the detailed Plan to the CPCs to receive their feedback before being presented to the Commission in 2018.	The <u>SSP</u> was circulated to CPCs in July 2018, and the comments received were addressed. The SSP was presented at the 93 <sup>rd</sup> Commission meeting (August 2018), but has not been adopted yet.					
4.	<b>Bigeye growth</b> . Convene a joint IATTC-WCPFC workshop of experts to analyze methodologies of age and growth	Project <u>E.2.b</u> was approved at the 93 <sup>rd</sup> Commission meeting (August 2018), and the workshop took place on 23-25 January 2019. A					

	Recommendation, SAC-09	Status (25 April 2019)		
	determination of tunas, with priority to	report will be presented at SAC-10 (agenda item		
	bigeye tuna.	7).		
5.	Tagging program. Provide funding for	Project E.4.a was approved at the 93 <sup>rd</sup>		
	the development and implementation	Commission meeting (August 2018); it was funded		
	of a well-designed, large-scale tagging	by the EU, with an additional contribution by the		
	program.	IATTC.		
		A <u>workshop</u> to review the proposed activities of		
		the tagging program took place on 28-30 January 2019. A report will be presented at SAC-10		
		(agenda item 8a).		
		The initial tagging trip began on 6 March 2019; a		
		progress report will be presented at SAC-10		
		(agenda item 8a).		
6.	Vessel characteristics and fishing	A presentation will be made at SAC-10 (Project		
	mortality: Present at the next meeting	J.2.a; SAC-10-10)		
	of the SAC an analysis of the			
	relationship on the depth of purse-			
	seine nets versus the levels of catch of			
	juvenile bigeye and yellowfin tunas.			
		COLLECTION		
7.	Electronic monitoring: Provide	Project D.2.a was funded by the European Union.		
	resources to extend the electronic	Cameras are installed on two Class-6 vessels and		
	monitoring pilot project to vessels of all	one Class-2 vessel; all three are currently fishing.		
	capacity classes	A report (SAC-10-12) will be presented at <u>SAC-10</u> (agenda item 8b).		
	В	YCATCHES		
8.	Maintain training activities for captains	Three workshops were held in August 2018, in		
	on the handling of bycatches on board	Manta, Ecuador (organized jointly with ISSF and		
	to ensure their return to the sea alive as	ATUNEC), with a record 160 attendees; Panama		
	far as possible.	City, Panama; and San Diego, USA (with the		
		American Tunaboat Association).		
LONGLINE				
9.	<b>Longline fleet</b> . CPCs should provide an	The Secretariat sent a reminder to CPCs on 11  March 2019 on the implementation of		
	annual report to the IATTC Secretariat, with a list of their longline vessels that	recommendation 9, which was extended later to		
	have fished in the EPO in the previous	all types of vessels and became mandatory under		
	year.	Resolution C-18-06, paragraph 5. To date (10 May		
	7-2	2018), excluding the CPCs having notified that		
		they had nothing to report, 5 CPCs (Chile, Chinese		
		Taipei,, Ecuador, El Salvador, and EU) provided		
		lists of their longline vessels that fished in the EPO		
		in 2018.		
10.	Abundance indices. The SAC	Project H.1.d was approved at the 93 <sup>rd</sup>		
	recommends that CPCs with large-scale	Commission meeting (August 2018). As part of this		
	longline fleets: 1) share the operational-	project, a workshop to improve the longline		

	Recommendation, SAC-09	Status (25 April 2019)	
	level data with the IATTC through an appropriate way; and/or 2) collaborate	indices of abundance was held on 11-15 February 2019.	
	with IATTC staff and other CPCs with large-scale longline fleets to develop	A report (SAC-10-14) will be presented at <u>SAC-10</u> (agenda item 7a).	
	improved abundance indices.	(agenda item 7a).	
		OTHER	
11.	<b>Scientists-managers dialogue</b> . The SAC recommends that the Commission	The Commission has not yet constituted this working group; however, the Management	
	create a dedicated working group to	Strategy Evaluation (MSE) work plan includes	
	facilitate dialogue among scientists,	various workshops involving all stakeholders.	
	managers, and other stakeholders.	<b>Project R.1.b</b> , approved at the 93 <sup>rd</sup> Commission	
		meeting (August 2018), includes workshops with	
		managers and other stakeholders in 2019 and	
		2020.	
12.	National reports. The SAC recommends	The Secretariat sent a reminder to CPCs on	
	that the CPCs present their national reports to the SAC following the format	implementation of recommendation 12 on 11  March 2019.	
	adopted by the SAC in 2014. CPCs are	Information on the data received will be	
	urged to prepare these reports to be	presented at <u>SAC-10</u> (agenda item 5b).	
	presented annually to the SAC.	presented at <u>5/10-10</u> (agental term 50).	
13.	Publication of SAC/WG documents:	Despite an unprecedented number of preparatory	
	The SAC reiterates its previous	workshops and meetings in 2019 to date, and	
	recommendation that meeting	some unforeseen issues with the yellowfin	
	documents (in particular stock	assessment, <u>all stock assessments were posted</u> by	
	assessments) are posted at the IATTC	23 April, 20 days before the SAC meeting. The	
	website three weeks in advance of the	staff expects to post its recommendations on	
	start of the meetings, and the	schedule.	
	recommendations regarding tunas two weeks in advance.
